DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Iwami (2003/0125136). Regarding claims 1 and 2, Iwami discloses a golf ball comprising a core and a cover. The cover is made from a) an olefin resin and b) polyolefin and nylon fiber components (abstract). Regarding claim 3, the components of item (b) are bound together [0054]. Regarding claim 4, the polyolefin may be a low-density polyethylene [0056]. Regarding claim 5, the nylon is nylon 6 [0057]. Regarding claim 6, the composition includes from 1 to 50 parts of (b) per 100 part of the resin (a) (abstract). Regarding claim 8, the composition is the outer cover layer.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3711

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Iwami (2003/0125136). Iwami further discloses the ratio between the polyolefin and nylon 6 components of (b) may be 75/87 and 75/75 [0058-0069]. One of ordinary skill in the art would have varied the weight ratios for the desired durability.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Iwami (2003/0125136) in view of Sano et al (5,929,171). Iwami does not disclose a two-layer cover. However, Sano teaches the use of a single or multi-layer cover. One of ordinary skill in the art would use a single or multi-layer cover for the desired durability.
